

ACULEO

ScoutStop™

Unwanted Beehive Prevention.

Scout

Intercepted

No Confirmation

Swarm Moves On

When bees look for a new nesting location, they send out scout bees to survey potential sites. **ScoutStop™ intercepts these scouts before they are able to report back,** therefore preventing them from choosing a nesting site on your property.

Discreet Design - Sleek, minimalist, blends into any environment.

Built for Any Space - Trusted for residential and commercial use, outdoors.

100% Safe for Humans and Bees - Protects people while minimizing harm to pollinators.

Works with BuzzBeacon™ - Pairs with Aculeo's patented pheromone lure for maximum effectiveness.

1 Simple Setup - Available as a ready-to-use unit.

****ScoutStop™ requires two 5.3" × 8" glue boards (readily available, not included or supplied by Aculeo).**

Protection in Plain Sight

ScoutStop™ is Aculeo's modern, discreet interception device designed to work seamlessly with **BuzzBeacon™**. Its minimalist form factor blends into homes and businesses environments, even in plain sight, delivering professional-grade results without drawing attention.

How It Works

- **Intercept the scouts.** ScoutStop™ attracts and captures scout bees during the swarming process when paired with BuzzBeacon's patented pheromone formulation.
- **Disrupts the swarm's communication loop.** Intercepted scouts never return to communicate a potential nesting site, so the swarm chooses another location.
- **Prevent hive establishment.** Without confirmation of a stable nesting site, colonies do not establish, reducing the need for hive removals or euthanasia later.

Key Benefits

INFESTATION PREVENTION

Through early-stage interception.

POLLINATOR-CONSCIOUS APPROACH

Hives never establish, so they're not destroyed.

DISCREET, PROFESSIONAL AESTHETIC

Suitable for high-visibility areas.

FAST DEPLOYMENT & SIMPLE SERVICE

With periodic checks and lure refreshment.

VERSATILE PLACEMENT

At high-risk points (roofs, soffits, signage, loading bays, patios).

Ideal For

- Pest Control Operators (PCOs)
- Facility & Property Managers
- Homeowners in high-swarm areas
- Schools
- Warehouses
- Hotels
- Retail & Dining
